

Plex Manufacturing Cloud IntelliPlex Services

Dashboard & Reporting Strategy

Get the most out of IntelliPlex with high level design & strategic consultations. Revolution Group's Plex certified development specialists build a roadmap for a successful IntelliPlex deployment in your organization.

IntelliPlex Training

Revolution Group offers both formal workshops and custom tailored training solutions. With Basic, Advanced and Finding Your Data Workshops, we will equip your team with the skills to build a successful IntelliPlex solution.

Starter Portal

Immediately unleash the power of IntelliPlex with our ready-made starter portal of dashboards, reports and charts. Deliver executive level Business Intelligence critical to manufacturing decision making.

IntelliPlex Custom Solutions

Revolution Group specializes in building dashboards, reports, and charts designed to meet the specific needs of your organization. Our customizable solutions follow a four step process: requirements gathering & analysis; portal, report and chart design; datasource design and development; and audience analysis.

Revolution Group has successfully supported the optimization of Plex for a number of clients frustrated with the "old way of doing things." Our experienced implementation, software development, and system integration resources will help you take advantage of the numerous functions Plex Manufacturing Cloud offers.

IntelliPlex cuts big data down to size, making it useful and actionable in ways that standard user screens and tabular reports cannot.

- Establish benchmark standards and measure performance against key indicators.
- Use reports and dashboards to visualize complex information. No programming skills needed.
- Discover hidden trends and inefficiencies as revealed by near-real-time reporting.

Revolution Group, a premier Plex implementation and development partner, offers a variety of services to get you up and running.
